EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jimmy L. Funke on 4/5/04.

The application has been amended as follows:

IN THE SPECIFICATION:

On page 3, line 1 "preset" has been changed to --present--; in line 28 --110-- has been inserted after "converter".

On page 4, lines 9 and 30 "124" has been changed to --122--.

IN THE ABSTRACT: the abstract has been amended as follow:

--A weldless flanged catalytic converter includes a body having an exhaust inlet end and an outlet end, and a snorkel tube disposed at one or both the exhaust inlet and outlet ends. The snorkel tube has a first end extending from the converter body and a second, distal end having a weldless flange that is integrally formed from the snorkel tube. A movable flange is disposed about the snorkel tube prior to the formation of the weldless flange. A method for preparing the weldless flanged catalytic converter includes disposing a movable flange (configured with the required tapped holes or other connecting means) over the snorkel tube of the converter. A second, weldless flange is prepared by flanging out a portion of the catalytic converter snorkel tube using appropriate metal forming techniques. In use, the weldless flange is held between the

movable flange on the snorkel tube and a connecting flange from, for example, the exhaust system. In an alternate embodiment, the weldless flange includes a drawn spherical structure (i.e., ball fitting).--

IN THE CLAIMS:

In claim 1, line 7 --tube-- has been inserted after "snorkel".

In claim 9, line 9 --wherein said movable flange is disposed between said first end of said snorkel tube and said second end of said snorkel tube-- has been inserted after "tube" (second occurrence).

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach a catalytic converter including a snorkel tube extending from a converter body at a first end of the snorkel tube and having a weldless flange integrally formed at a second end of the snorkel tube, and a movable flange disposed about the snorkel tube between the first end of the snorkel tube and the second end of the snorkel tube.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kobayashi et al, Mizusawa et al and Kreucher et al are cited for showing state of the art.
